jura. COOL CONTROL

Counter top refrigeration at a reasonable price!

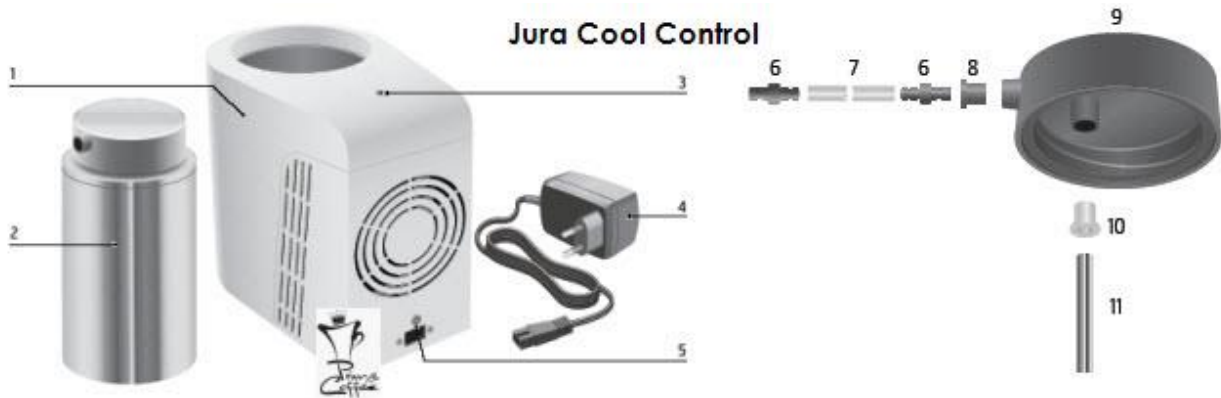

Durable and CFC-free, the peltier cooling principle used in the JURA Cool Control chills milk up to 77 degrees below the ambient temperature. Once a temperature of 40 degrees has been reached, the intelligent appliance keeps the milk in the optimum temperature range, which not only prevents it from freezing, but also helps you conserve energy. Remove stainless steel tank and place in refrigerator at the end of day.

Capacity 1.2 Liter / 8.25" H x 6"W x 8.25"D / 120V 20W
